Notes:

According to the EFSI 2.0 Regulation (Art. 9), the EIB shall target that at least 40 % of EFSI financing under the IIW support project components that contribute to Climate Action (CA); EFSI financing for SMEs and small mid-caps shall not be included in that computation.

The CA % is calculated over the EFSI financing (signed) excluding any portion for SMEs/small midcaps, which, for all operations with CA component, gives a total of **EUR 11,090.86m**

The overall CA % is calculated in relation to the total EFSI financing (signed) excluding portion(s) for SMEs/small midcaps, which is **EUR 30,854.81m** ($11090.86/30854.81 * 100 = 35.95 > 36 \%$)
